## Introduction

- I'm a hard worker, I learn fast, and I depend on self-learning. I have big job experience in communicating with people field, skilled in convincing techniques. Qualified enough to prove that I can be more than what you would expect from me.

## Education

- Jordan University of Science and Technology  
  
- **Bachelor's in Software Engineering**  
09-2020

## Languages

Arabic    ★   ★   ★   ★   ★  
English   ★   ★   ★

## Skills

Teaching   Computer Skills   Fast Typing  
Leadership   Self-Motivated   Time Management  
Hard working   Self-Learner   Creative  
Communication skills   Microsoft Office Proficient

## Personal Skills

SQL   HTML   CSS  
Java Script   Bootstrap   JQuery  
Software design   Testing   UML  
Requirement   Security   Git&GitHub  
Asp.net MVC   MVC architecture  
Word Press   Data Analysis

## Work Experience

- Build web site using Word Press
- Installing video conference
- Note: University Training  
*Jamma advanced Technology*

## Personal Projects

---

### ○ Child home care management system (System)

- The system targets the Ministry of Social Development Challenged child care homes In the Hashemite Kingdom of Jordan

#### What the system present:

- Converting the child care homes system to a fully electronic system through:
  - Convert children's files to electronic files
  - Supervisors and parents are able to follow the child in an easier way by adding notes on the child's behavior and can be displayed to the stakeholders.
  - People from outside the system can register in the system and submit an application to sponsor an orphan through the approval of the Ministry's supervisor.
  - The supervisor of a child care home can accept or reject volunteer work from people
  - The supervisor of the ministry can establish homes for child care homes and appoint supervisors from the ministry to become the supervisor of the house assigned to him.
  - Enabling the supervisor in the child care home to add a new child at home and create a file to his parents.
- created web site interactive between many users
- using MVC architecture
- Note: My Graduation project

Utilized: C#, Asp.net, Entity framework, Html, Css, Javascript, JQuery, Bootstrap

### ○ High level Academy (Website)

Build website about high level academy school

Utilized: Word Press , Html, css

[Hla.edu.jo](http://Hla.edu.jo)

## Certification

---

- Data analysis Certification by Udacity
  - Sql for data analysis
  - Descriptive Statistics
  - Data visualization

[References](#)

## Voluntary Experience

---

- Giving reversion lectures before exams for each course in cooperation with the department and student union.

*Jordan university of science and technology*

- A player in the university`s volleyball team (09/2014 – 06/2020)
